

STATE OF CALIFORNIA  
REGIONAL WATER QUALITY CONTROL BOARD  
SAN FRANCISCO BAY REGION

STAFF SUMMARY REPORT (Vic Pal)  
MEETING DATE: February 12, 2014

**ITEM:** 5C

**SUBJECT:** **Waste Management of Alameda County, Inc. - Tri-Cities Recycling and Disposal Facility, Closed Fill Area 1 Landfill, Fremont, Alameda County** – Update of Waste Discharge Requirements and Rescission of Order No. 94-049

**CHRONOLOGY:** 1994 – Waste Discharge Requirements (WDRs) adopted

**DISCUSSION:** The Tentative Order (Appendix A) would update the WDRs and the self-monitoring program for the Closed Fill Area 1 Landfill (Landfill). The Landfill is owned by Waste Management of Alameda County and was operated as a Class III disposal facility from 1967 to 2013. The Landfill encompasses an area of approximately 115 acres located within a 378-acre parcel that is bounded on the south and west by part of the Don Edwards San Francisco Bay National Wildlife Refuge used as salt evaporation ponds and on the north and east by undeveloped land.

The Tentative Order would update the monitoring program for groundwater and leachate and would require the Discharger to submit long-term flood protection reports every five years specifying protections against a 100-year flood event and sea level rise.

No comments were received on the Tentative Order during the public comment period. We have made minor formatting and editorial changes to the Tentative Order and anticipate it will remain uncontested.

**RECOMMEN-  
DATION:** Adoption of the Tentative Order

**FILE NO.:** CIWQS Place ID 266373

**APPENDIX A:** Tentative Order
